Half-Mile Stretch of River Road, or Mississippi Scenic Route, Has Been Covered With Clay.

The Inland Navigation company is asking the Greater Moline committee to furnish it with photographs of the Moline river front, doubtless with a view to ascertaining the facts about existing or possible steamboat landings and conveniences for the handling of freight. The committee at its meeting at ndon yesterday voted to furnish the photographs.

The Greater Moline committee also took up the matter of Moline's need of an auditorium to accommodate large conventions, musical and other entertainments. The committee adopted a resolution under which Chairman Abraham is authorized to appoint a committee of three, of which he shall be chairman, to enlist in this enterprise the public and such organizations as it may be possible to in-This committee of three, which Chairman Abraham will soon name, is authorized to pledge the active support of the entire membership of the Greater Moline committee to the people or organizations that may lend their aid to bringing the coliseum into materialization.

### MANY PAPERS IN TOWNS OF GREECE

Comparatively Small Cities Support Huge Number of High Grade Daily Publications.

Saloniki, Greece, Jan. 6 .- (Correspondence of The Associated Press.) The French and British troopers stationed in Saloniki since the beginning of the allied Balkan undertaking never cease to marvel at the number of newspapers able to live in a city of, normally, only about 150,-000 inhabitants, of whom a very large percentage cannot read or write. Though the second city of Greece since its conquest by the Greeks in the last Balkan war, Saloniki has never been and is not now in any real sense a Greek city. Indeed, a scant 25 per cent of the population is Greek. The city supports five Greek daily newspapers, three morning and two afternoon journals. Besides these, probably the most widely read of all is the unique daily, the Forward, which is printed in Hebrew characters for the benefit of the overwhelming Jewish population of the place-but Hebrew characters spelling out Spanish, not Hebrew words!

The newspapers of all Greece play a very important if not a dominant part in the politics so much the leading occupation of the Greeks. There is no such thing in Greece as a politically independent newspaper, in the sense that a newspaper may be politically independent in the United States or in France. Every Greek daily is either for or against Venizelos-that being the cardinal political test. This is true, of course, of those in Saloniki as well.

The Light, a morning, and The New the former in addition to being bit- 58, A. F. & A. The Spanish-Hebrew evening paper, the Forward, is, as its name implies, socialist in politics and pro-German.

While a mixture of Spanish and Italian is the current tongue spoken by the great majority of the inhabi tants of Saloniki, French is also spoken widely, generally understood and universally read. There are, therefore, four French dailies pubof view. But in respect of the newspapers published in French, there is more partisanship on the subject of the European war. The mean tomb in the little chapel recalls the regicide that stirred all the world-with the exception, according to the contemporary reports, of Serbla itself-in June, 1903. Trouble had been accumulating for years at the Serbian court. Alexander had allenated his father Milan and offended various European courts by marrying Draga Mascin, widow of an engineer and a former lady in waiting of Queen Natalie. Nepotism and general favoritism still further embittered the old court party at Belgrade. Particularly was there wide disaffection among the army officers.

What gave greater impetus to the growing conspiracy against King Alexander was his act in suspending the constitution on April 7, 1903, declar-
